Bambino - Colour concept	Page 27

Our nursery school washroom concept has two main aims.

On the one hand, children should feel at home and be happy to use the bathrooms. On the other hand, it offers a solution which meets your needs as a facility operator, with an attractive balance of cost and benefit.

Our specialist advisers on location can give you expert support when planning the restrooms in your nursery school.

1 Maximum safety for your children

Well thought-out details at all critical points reliably eliminate any injury hazards. From rounded edges which protect against trapping a finger, to use of certified materials and designs. The Bambino range is TÜV approved and GS (tested safety) certified.

2 Educational and child-friendly concepts

Based on our broad colour palette and special ergonomic, age-appropriate solutions, we develop sanitary facilities with a clear educational concept giving a feeling of well-being. The colours create a friendly effect and help the children orientate themselves.

3 Complete room solutions of the highest possible quality

Perfectly aligned, tailor-made individual products - partitions, washing areas, baby changing combinations, shelves, storage, potty benches and special furniture - guarantee a harmonic overall impression with long durability.

4 Expert advice and comprehensive service on-site

Local specialists and qualified assembly teams guarantee quick response times - from the initial conversation about a 3D plan to fitting by our fully trained premium fitters. Please visit our website at www.kemmlit.de

Partitions | safe, attractive, creative

The Bambino partition wall system is available in three different designs: B-Bambino Exklusiv, B-Bambino Klassik and D-Bambino Klassik. So that the little ones can master the bathroom alone, the partition walls are not only both TÜV and GS (tested safety) certified, they also meet all the accident insurance requirements.

KEMMLIT safety ring handles:

Specially offset handles without any sharp edges with integrated rubber stop - nothing can go wrong.

KEMMLIT safety doors:

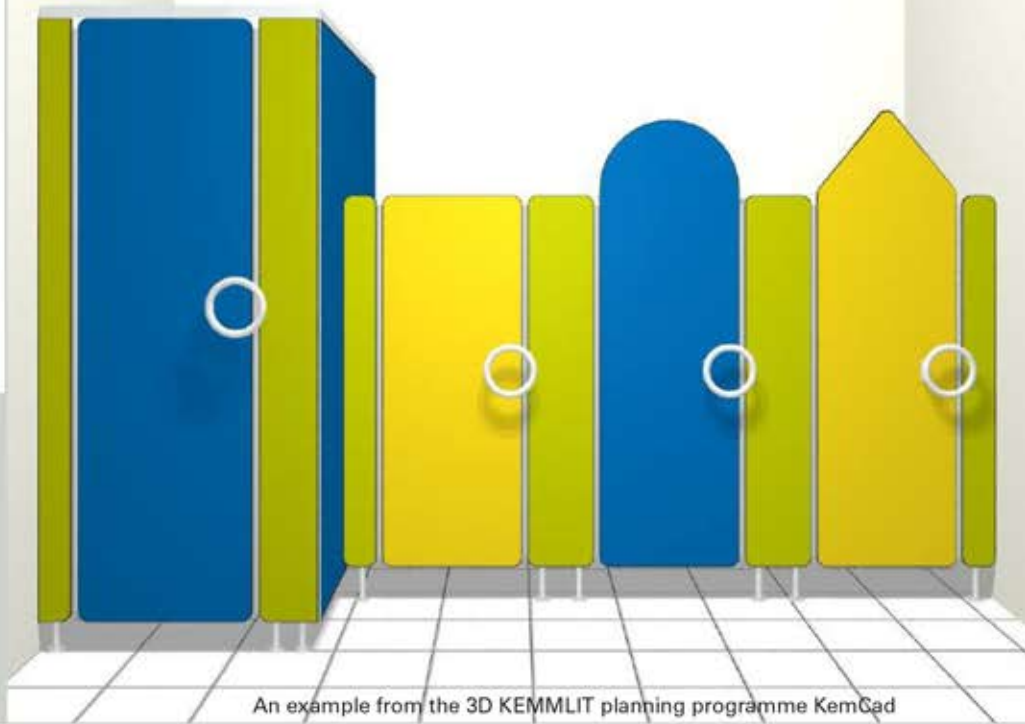

Self-closing, outwards opening doors with special soft lips, which can be locked with a child-friendly locking lever as an option.

KEMMLIT safety finger protection:

Maximum protection for children's hands via a special aluminium safety tube throughout - this eliminates the creation of any gaps in the door and thus prevents any danger of trapping a child's hands.

KEMMLIT safety edges:

Rounded edges and corners on all doors and wall elements, fixings and connection points prevent injuries.

An example from the 3D KEMMLIT planning programme KemCad

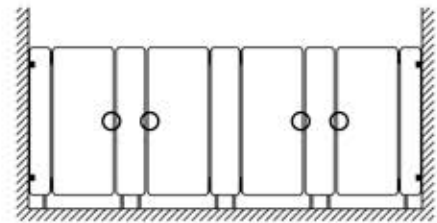

The doors come in three different designs
straight doors, rounded doors or triangular shaped doors.

With appropriate functionality, colours and designs we can fit every
room with child-friendly bathroom accessories on request.

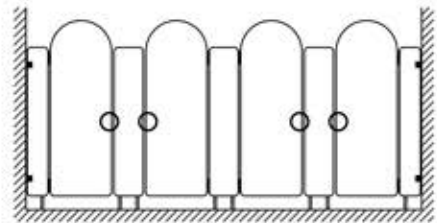

The Bambino solution for underfloor heating consists of high
front panel, stabiliser head rail and adhesive feet. This KEMMLIT
solution guarantees maximum stability and prevents any damage
to your underfloor heating.

The Bambino partitions can also be designed as
adult cubicles or combined with other KEMMLIT products.

Design options

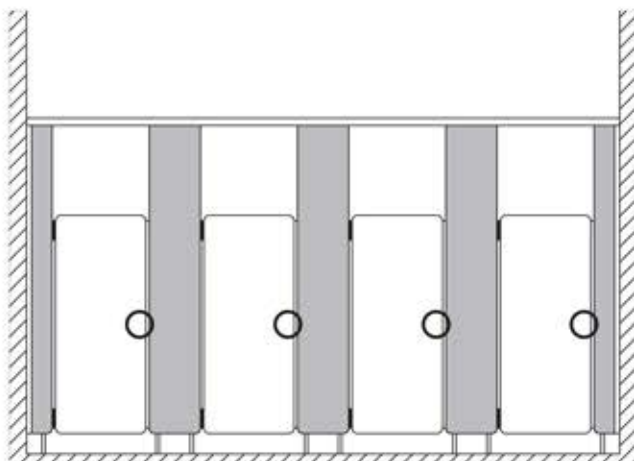

Option 1: with straight doors

Option 2: with rounded doors

Option 3: with triangular shaped doors

dreams within reach

B-Bambino Exklusiv | Putting kids' dreams within reach

With the **B-Bambino Exklusiv** partitions for nursery schools and day-care centres, sanitary facilities become an adventure world. Partition wall designs, handles and bathroom accessories create a lovely atmosphere in the restroom and at the same time make kids' dreams come true - for little knights, mermaids and explorers.

With individual digital prints on the panels and doors, we can create a wide range of theme worlds. The exclusive door handles enable exciting designs and reinforce the visual effect of the theme world. The handles can be exchanged at any time, so the solution remains flexible and timeless thanks to the compelling designs. The theme world supports educational concepts which the children can experience in a playful way. This leads to sanitary facilities which really are special - rooms where children will be happy to spend some time.

The corners are rounded with a radius of 6 mm to prevent any injuries. Supporting legs, hinges and panel holders are made of satin anodised aluminium. Besides the theme worlds, panels and doors can also be realised in white with white edges.

B-Bambino Exklusiv | Aquarius

Theme world "Aquarius" for little pirates, mermaids and ships' captains

- Aquarius digital printing on the outside panels and doors - one-sided printing. Internal sides and partition panels are white, each with black edges
- Aquarius door handles: clown fish, blue whale, sea horse and mussel
- Supporting legs, hinges and panel holders made of satin anodised aluminium

B-Bambino Exklusiv | Safari

Theme world "Safari" for little monkeys, scientists and explorers.

- Safari digital printing on the outside panels and doors - onesided printing. Internal sides and partition panels are white, each with black edges
- Safari door handles lion, monkey, elephant and hippo
- Supporting legs, hinges and panel holders made of satin anodised aluminium

B-Bambino Exklusiv | Knight's castle

Theme world "Knight's castle" for little warriors, dragon hunters and magicians

- Knight's castle wooden decor on both sides of the doors, front and partition panels in quartz grey 7708, each with black edges
- Knight's castle door handles: flag, horse, helmet and shield
- Supporting legs, hinges and panel holders made from anodised aluminium

B-Bambino Esklusiv | Bianco

Theme world "Bianco" for little painters, artists and colour experts

- Front panels, doors and partition panels made of white HPL, with white edges
- Designed with Bianco "splodge" door handles.
- Supporting legs, hinges and panel holders made of satin anodised aluminium

B-Bambino Exklusiv | Bianco

Theme world "Bianco" for little number wizards, mathematicians and calculation geniuses

- Front panels, doors and partition panels made of white HPL, with white edges
- Designed with Bianco "number" door handles.
- Supporting legs, hinges and panel holders made of satin anodised aluminium

B-Bambino Klassik | safe, solid, tried and tested

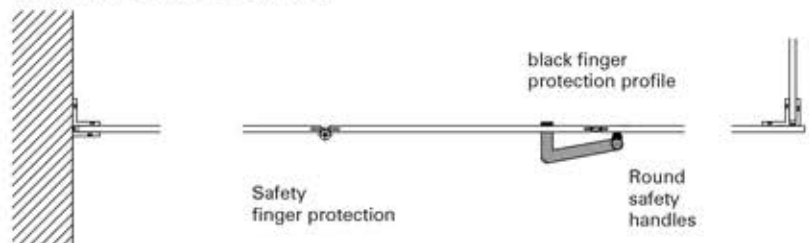

The B-Bambino Klassik partition wall system for nursery schools consists of 13 mm thick HPL solid core panels. High Pressure Laminate (HPL) is water resistant, decay proof, extremely resistant to damage and easy to clean.

The corners are rounded with a radius of 33 mm to prevent injuries.

The doors are fitted with safety finger protection made of black finger protection profile on the door stop side and an aluminium finger protection tube throughout on the hinge side.

B-Bambino Klassik comes either with a rounded nylon safety door handle or with one of the theme character handles. The supporting legs consist of high-quality aluminium with nylon cover sleeve. Under panel clearance of 120 mm is standard. Special heights are available on request.

13 mm HPL solid core panel

D-Bambino Klassik | safe, solid and reasonably priced

The D-Bambino Klassik partition wall system for nursery schools consists of 30 mm thick melamine resin coated particle boards. All visible edges are impact protected with 3 mm thick ABS lipping, colour to match the fittings and profiles. The corners are rounded with a radius of 33 mm to prevent injuries.

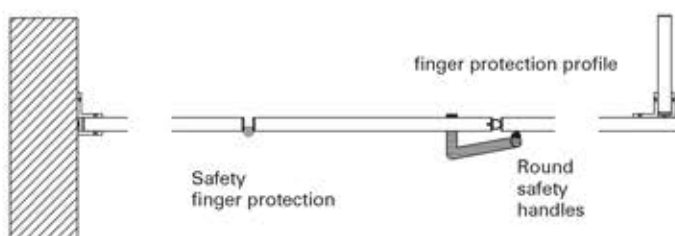

The doors are fitted with a colour matched safety finger protection made of a 20 mm wide soft lip on the door stop side and an aluminium finger protection tube throughout on the hinge side.

D-Bambino Klassik comes either with a rounded nylon safety handle or with one of the theme character handles. The supporting legs consist of high-quality aluminium with nylon cover sleeve.

Under panel clearance of 120 mm is standard. Special heights are available on request.

30 mm solid chip board

Vanity units | perfect in every detail

Bambino vanity units from KEMMLIT set new standards with their exemplary ergonomics, the variety of colours and shapes and their easy to clean, robust construction.

Vanity units that grow with you:

Both children just starting nursery school as well as children about to start school will feel right at home at the freestanding, variable in height KEMMLIT wash stands. And as the basins come well out into the room, several children can share a wash stand at the same time.

Safety down to the last detail:

The mirror set into an HPL panel not only rounds off the overall impression of the room perfectly, they also increase the safety level.

Easy to clean, robust and hygienic:

These qualities apply to all KEMMLIT products, particularly the flush fitting wash hand basins made from mineral composite material.

Shapes designed to match your rooms:

We make your individual solution to measure - from one source. Colours and shapes form a harmonious, child-friendly entity for the entire washroom.

Baby changing units | simply ingenious

KEMMLIT leaves nothing to be desired. Our long experience means we know your requirements - and that means we get every detail right.

Quite simple - well thought-out baby changing combinations:

Made from water-resistant HPL with plenty of room in the cupboards which come either with drawers or open compartments.

The modular construction allows individual adaptation to suit the situation in the required area.

Safe due to the surrounding anti-fall guard. Comfortable due to the integrated jointless baby bath tub, made from robust mineral composite material which never feels cold, where you can also shower infants - also available with a wash basin.

As an option, the drawers can be locked centrally with a rotary knob on the rear edge. As a special highlight, you can get the baby changing combination with pull-out steps - either straight or as a spiral staircase - convenient for the little ones.

Choose from one of our three design options for your baby changing station. Opt for a robust solution from our standard range. Put together your own personal baby changing combination from our individual modules, or design your individual combination to fit precisely into your room.

Shelving and special furniture | Coordinated in every detail

Ideas to deal with space issues

Freestanding toothbrush mug shelves with towel holders create space and function as room dividers.

Coordinated in every detail

Smooth, made to measure, easy to clean toothbrush mug shelves with identification pictures, matching mugs and hooks in various designs.

Shelves with built-in safety

The slope on the surface of the KEMMLIT safety shelf can be adjusted with a special mechanism during assembly so that any objects knocked over by accident always roll to the back, and therefore never fall on the children - simply ingenious.

Tailor-made special furniture

Cupboards, shelves, safety mirrors, potty benches and much more round off our comprehensive range for the nursery schools.

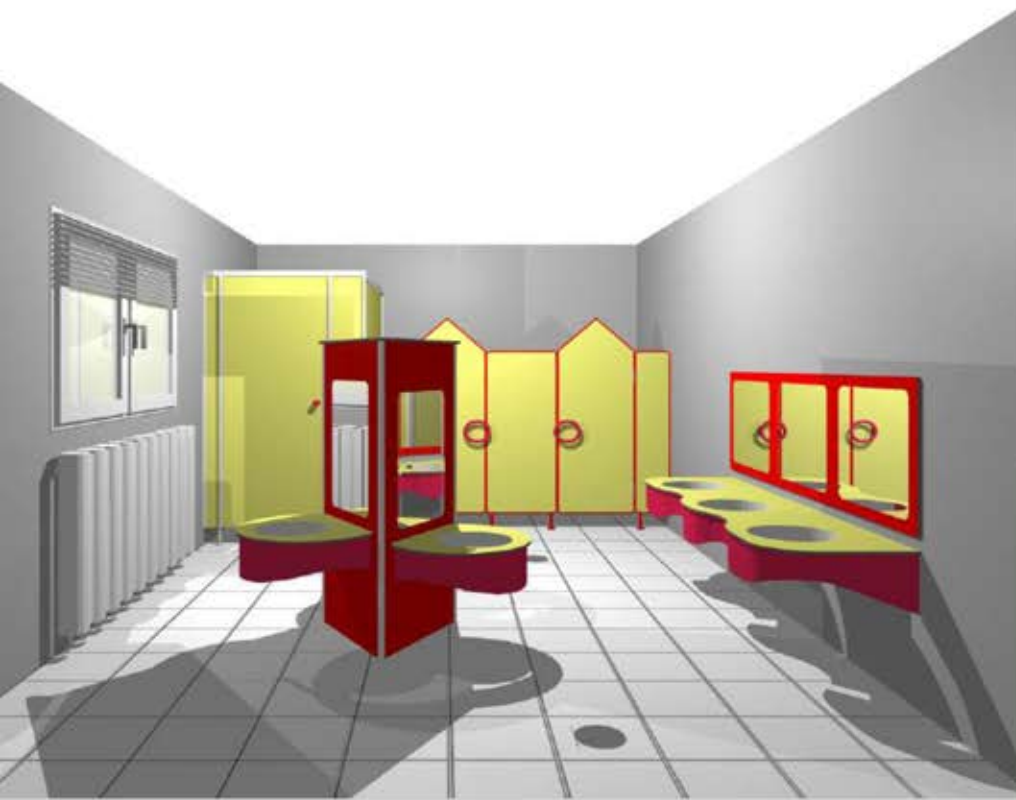

Washroom accessories | we've thought of everything

Our comprehensive range of sanitary facility accessories and equipment is fully incorporated into the Bambino shape and colour concept. The precise placement of the elements is considered as early as the planning stage.

For example:

- Locking lever: For the secure locking of individual WC cubicles
- Pictograms: To help the children find their way around
- Toilet roll holders: Shape and colour to match the Bambino range
- Toilet brush fittings: Extremely abrasion resistant surface also offers excellent protection against most chemicals, cleaning agents and disinfectants.
- Toothbrush mugs: Sturdy, child-friendly and non-slip
- Baby changing mats: Made from high-quality PES (Polyester) with single-sided PU coating, PVC free.

Bambino | Advice and planning in 3D

As the perfect complement to personal advice on location, KEMMLIT also offers fast, to scale, three dimensional planning service for rooms and products for sanitary facilities, showing specific product details and thus guaranteeing planning certainty.

Alongside your personal expert advisor from KEMMLIT and our experts in the factory, this means you can design your sanitary facilities completely as you wish and according to the children's requirements.

Thanks to professional and individual planning you can get a very real impression of the room from the outset.

Regardless of the size of the project, KEMMLIT supports the client project all the way through, from the initial concept to the assembly on-site.
